Abdalraof Benaesha

Address Manchester. Open To Relocate

Phone 07733466176

E-mail abdulraofbenaesha@yahoo.co.uk

I educate, refine and drive myself to be better person as I am constantly learning. I enjoy exploring by testing and building. I would keep thriving to learn and contribute in a collaborative environment and I am looking forward to working in a company where I can grow my passion and carry on exploring.

Technical Skills

JavaScript, NodeJS, Express, Knex, HTTP, SQL, PostgreSQL, React, CSS, HTML5

Experience

2021-01 - 2021-05   **Northcoders' Student - Northcoders, Manchester**

Northcoders is a leading coding school that offers a full-stack 14 weeks intensive course that is an industry-led programme. Being a Northcoders student is like working full-time, throughout course; I studied the fundamentals of JavaScript including functional and object-oriented programming. In Back-End, I studied Node.js, asynchronous programming and learning about APIs and databases such as HTTP, Express, SQL, and Postgres. In Front-End, I learnt about the DOM making accessible websites with semantic HTML and responsive CSS. And mainly using React framework and learning about key peripheral technologies. the skills I developed:

- Applying agile pair programming on projects.
- Using test driven development *TDD* approach.
- Establishing projects workflow on *GitHub* using version control with *Git*.
- Writing Psuedo code on how each problem will be approached.
- Writing clean code and human readable.
- Working individually on different code katas with *TDD* every day.

Projects

Personal Portfolio:

Building my first personal portfolio website with a complete HTML, CSS and JavaScript. It was good practice for my CSS skills. This website will be improved regularly.

- **Link to repository:** GitHub repository

APIs server project:

Building a back-end API server for news website. The project has been build using testing environment and applying multiple technologies such as JavaScript and NodeJS, Express back-end framework, SQL, Postgres, Knex SQL query builder Jest, super-test.

- **Link to repository:** GitHub repository

Front-End:

Building a frond-end Hangman game. The game is built using *React* framework and sole purpose of building this game is more of a practice and an understanding of how react

works. The involved technologies such as React.js, CSS and different JavaScript functionalities applied in the game.

- **Link to repository:** [GitHub repository](#)

creating a React-based interface to present data from a GitHub API in an interactive and engaging way. What you display and how you display it is entirely up to you, but your app must allow users to interact with your data visualisation in some way. The basic idea is that a digital coding-centred business card is created from public information on your GitHub profile.

2018-09 - **Store Supervisor - Kurt Geiger, Manchester**
2019-01

2015-11 - **Sales Lead - Aldo Group, Manchester**
2018-09

Education

2021-01 - **Web Development Bootcamp**
Current *Northcoders - Manchester*

2017-09 - **Master of Science: Petroleum and Gas Engineering**
2018-12 *University of Salford - Manchester*

2014-09 - **Bachelor of Science: Mechanical and Petroleum Engineering**
2017-06 *University of Salford - Manchester*

Volunteering

I am member in Cheadle Cycling Club (CCC), I volunteered in summer 2018 to cycle for 60 miles from Heald Green to Blackpool Tower to raise money for a good cause for a new-built mosque, so the community can have better facilities and to have more rooms for the CMA primary school and to accommodate larger activities. Also, I am contributing again this August for the same cause in cycling ride from London to Paris (180miles).

Interests

- Cycling - when I am not coding, I go out cycling to challenge the uphills.
- Hiking - I love discovering new scenery
